

Sustainability Policy

Policy

The organisation commits to continually improving our social, cultural, environmental, economic and organisational sustainability. The organisation will apply the principles of sustainability in the development and implementation of strategic, operational, program and project plans.

The organisation aim is to embed sustainability in all processes and activities, informed by evidence-based good practice and collaborative engagement with communities. The organisation will endeavour to identify and address any adverse impacts that the organisation services or activities may have on the environment and communities.

The organisation is committed to educating and motivating staff, volunteers, people who use the organisation services and other stakeholders to think and act in a sustainable way including continuous improvement opportunities, energy efficiency, water efficiency, resource efficiency and waste reduction.
